PROFESSIONAL SUMMARY

DevOps Engineer with 2+ years of experience in Linux Administration, Networking, AWS Cloud, and DevOps automation. Experienced in building CI/CD pipelines, automating infrastructure using Terraform and Ansible, deploying containerized applications with Docker, and managing cloud infrastructure on AWS. Skilled in Linux server administration, production deployments, monitoring, infrastructure automation, and troubleshooting highly available applications.

TECHNICAL SKILLS

Operating Systems: Ubuntu, CentOS, RHEL, Linux Mint

Linux: User & Group Management, LVM, SSH, Cron Jobs, File Systems, Package Management, System Monitoring, Backup & Restore

Networking: TCP/IP, HTTP/HTTPS, DNS, NAT, Routing, VPN, Firewall, iptables, Security Groups, Network ACLs

AWS: EC2, EBS, AMI, VPC, IAM, S3, ECR, ECS, Lambda, API Gateway, CloudFront, Route 53, Elastic IP, ALB, Auto Scaling

DevOps: Git, GitHub, Jenkins, CI/CD, Terraform, Ansible

Containers: Docker, Docker Compose, Dockerfile, Image Versioning, Container Lifecycle Management, Kubernetes

Monitoring: Prometheus, Grafana, Alertmanager, Node Exporter, Blackbox Exporter, CloudWatch

Web Servers: Nginx, Apache, Tomcat

Programming: Shell Scripting, Python (Basic), Groovy

PROFESSIONAL EXPERIENCE

Junior Consultant – DevOps Engineer

Aug 2025 – Present

RetailResonance LLP (A Unit of Pace Automation), Chennai

- Provisioned and managed AWS infrastructure using Terraform and Ansible.
- Built and deployed containerized applications using Docker and Docker Compose.
- Configured AWS services including EC2, ECS, ECR, VPC, IAM, S3, Route 53, CloudFront, API Gateway, Lambda, and Auto Scaling.
- Implemented infrastructure monitoring using Prometheus, Grafana, Alertmanager, and Node Exporter.
- Performed production deployments, infrastructure maintenance, and troubleshooting across Linux and AWS environments.

Key Projects

AI Chatbot and Automation Platform

Technology Stack: AWS — Git — GitHub — Jenkins — Docker — Nginx — Application Load Balancer

- Developed and maintained Jenkins CI/CD pipelines for automated application deployments.
- Built Docker images and deployed containerized applications on AWS EC2.
- Configured Nginx as a reverse proxy and Application Load Balancer (ALB) for high availability.
- Managed production deployments, release management, monitoring, and troubleshooting.

Legal Services Platform

Technology Stack: AWS — Git — GitHub — Jenkins — Docker — Lambda — API Gateway — S3 — CloudFront

- Automated application deployments using Jenkins and Docker.
- Configured AWS Lambda, API Gateway, Amazon S3, and CloudFront.
- Supported production deployments, monitoring, and troubleshooting.

Kubernetes Deployment Lab

- Deployed containerized applications on Kubernetes using Deployments and Services.
- Managed Pods, ReplicaSets, ConfigMaps, and Secrets using kubectl.
- Performed rolling updates and rollbacks to ensure zero-downtime deployments.

Junior Network Engineer

May 2024 – Jul 2025

Pace Automation Ltd, Chennai

- Managed and administered 20+ Linux servers across production environments.
- Installed, configured, and maintained Apache, Nginx, Tomcat, and MySQL servers.
- Performed Linux administration, networking, system monitoring, backup, and security management.
- Automated routine administration using Shell scripting, Cron jobs, and rsync.
- Supported Jenkins CI/CD pipelines, Docker deployments, and GitHub repositories.
- Provisioned AWS EC2 instances, EBS volumes, Security Groups, and Elastic IPs.
- Troubleshoot production issues and supported infrastructure maintenance.

Key Projects

AI Education Platforms

Technology Stack: AWS — Git — GitHub — Jenkins — Docker — Terraform — Ansible

- Provisioned AWS infrastructure using Terraform.
- Automated application deployments using Jenkins, Docker, and Ansible.
- Supported production deployments and infrastructure automation.

Restaurant Management Platform

Technology Stack: Git — GitHub — Jenkins — Docker — Nginx

- Implemented Jenkins CI/CD pipelines for automated deployments.
- Deployed backend applications using Docker and configured Nginx as a reverse proxy.
- Supported production deployments and troubleshooting.

CERTIFICATIONS

Red Hat Certified System Administrator (RHCSA) Certification ID: 240-054-288 Valid Until: April 2027

EDUCATION

Bachelor of Engineering (Mechanical Engineering) AVS Engineering College, Salem

Affiliated to Anna University

2013 – 2017
